SUMMARY

Results-driven Frontend & Mobile Engineer with 3+ years of experience designing and shipping production-grade web and mobile applications. Specialised in React, React Native, and Next.js, with strong working knowledge of Flutter for cross-platform mobile delivery. Proven track record leading frontend teams, releasing consumer apps to the Google Play Store, and architecting performant Next.js websites with TypeScript, Tailwind CSS, and modern data-fetching patterns. Strong focus on component-driven architecture, accessibility, performance optimisation, Core Web Vitals, and SEO best practices.

EXPERIENCE

Lead Frontend / Mobile Engineer

Storytime4Kids

September 2025 - Present, Remote

- Led end-to-end delivery of the Storytime4Kids mobile app to the Google Play Store, owning architecture, release engineering, and post-launch iteration.
- Built the cross-platform app primarily in React Native with Expo (EAS Build & OTA Updates), with selected features prototyped in Flutter — covering navigation, audio playback, offline reading, and push notifications.
- Designed and shipped the public marketing and content website with Next.js (App Router), TypeScript, Tailwind CSS, and React Server Components, hitting strong Core Web Vitals scores out of the gate.
- Architected a typed API and data-fetching layer with React Query and Zod schema validation, sharing models between the React Native app and the Next.js website to remove duplicated state logic.
- Set up CI/CD pipelines on GitHub Actions and EAS for automated linting, type-checking, unit and integration tests, and store-bound builds — cutting release time significantly.
- Led frontend technical decisions, ran code reviews, mentored junior engineers, and authored coding standards (ESLint, Prettier, Conventional Commits, Storybook).

Lead Frontend Developer

The Bull Squad Travels

June 2023 - Present, Lagos, Nigeria

- Architected and shipped a responsive Next.js website for The Bull Squad Travels using TypeScript and Tailwind CSS, with App Router-based routing and server components for fast initial loads.
- Translated Figma designs into pixel-accurate, accessible React components and built a reusable design-system layer for buttons, forms, and layout primitives.
- Improved Core Web Vitals (LCP, CLS, INP) through image optimisation, route-level code splitting, font preloading, and lazy hydration of non-critical UI.
- Implemented SEO best practices — semantic HTML, structured data (JSON-LD), dynamic Open Graph metadata, and automatically generated sitemaps — increasing organic search visibility.
- Integrated REST APIs and third-party booking/payment services using React Query for caching, retries, and optimistic UI updates.
- Set up CI/CD with GitHub Actions and Vercel for automated linting, type-checking, and preview deployments on every pull request.
- Collaborated cross-functionally with designers, backend engineers, and stakeholders to deliver cohesive end-to-end user experiences and ship features on tight deadlines.
- Mentored junior contributors, ran code reviews, and established frontend conventions (ESLint, Prettier, Conventional Commits) across the codebase.

Frontend Developer

Veridux

September 2023 - March 2024, Lagos, Nigeria

- Built a dynamic e-commerce frontend in React with TypeScript, including sorting, faceted filtering, and full-text product search across the catalogue.
- Implemented a secure shopping-cart and checkout flow with form validation, order summaries, and integration to a third-party payment gateway, with strict handling of sensitive data.
- Designed accessible, responsive UI components with Tailwind CSS — improving conversion across mobile and desktop and meeting WCAG AA contrast requirements.
- Managed application state with Redux Toolkit and server state with React Query, reducing duplicated logic and removing redundant network requests.
- Integrated REST APIs for inventory, orders, and authentication, building a typed API client layer that surfaced clear errors to the UI.
- Optimised page load and runtime performance with code splitting, memoisation, and image lazy-loading, keeping the experience snappy on low-end devices.

EDUCATION

Bachelor of Science, Surveying and Geoinformatics

University of Benin • Benin City, Edo State • 2024

PROJECTS

E-commerce Website

Veridux • veridux.com.ng • September 2023 - March 2024

- Frontend Developer — built the storefront, product catalogue, cart, and checkout in React + Redux Toolkit + Tailwind CSS.

Storytime4Kids — Mobile App & Marketing Site

Storytime4Kids • Google Play Store + Web • September 2025 - Present

- Lead Frontend / Mobile Engineer — React Native (Expo), Flutter, Next.js, TypeScript, Tailwind CSS; shipped to Google Play Store and the public web.

Travel Agency Website

The Bull Squad Travels • thebullsquad.org • June 2023 - Present

- Lead Frontend Developer — designed and shipped the public marketing site in Next.js + TypeScript + Tailwind CSS, with SEO and Core Web Vitals tuning.
-

SKILLS

Technical Skills: React, React Native, Next.js (App Router & Pages Router), TypeScript, JavaScript (ES6+), Flutter, Dart, Tailwind CSS, Sass, Redux Toolkit, Zustand, React Query, GraphQL, REST APIs, HTML5, CSS3, Node.js, Expo (EAS Build & Updates), Jest, React Testing Library, Detox, Git, GitHub Actions, Vercel, Firebase.

Industry Knowledge: Component-driven architecture, SSR/SSG/ISR, React Server Components, mobile app delivery to Google Play Store, push notifications (FCM), deep linking, offline-first storage (AsyncStorage, MMKV), accessibility (WCAG AA), Core Web Vitals, performance profiling, UX/UI, DevOps & CI/CD, testing & debugging, Agile/Scrum.
